New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea. Discover The Pt. Cruiser; Shaped By The Past With A Retro Twist. A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips. For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years. A historic shift is occurring in the nature of management. Until recently, bosses could simply use the power of their positions to direct and order their subordinates. However, in today's workplace, which is significantly different from the remarkably homogenous and traditional business environment of just two decades ago, the approach of command authority no longer works effectively. Winning 'em Over chronicles a revolution. We are witnessing an ancient model of managing built around

command and hierarchy give way to a new model built around persuasion and teamwork. Jay Conger demonstrates to managers on all levels how to thrive in the wake of this momentous transformation. Today we work in an environment where people don't just ask "What should I do?" but "Why should I do it?" To successfully answer this "why" question is to persuade. Yet many businesspeople misunderstand and still more make little use of persuasion. The problem? Persuasion is widely perceived as a skill reserved for selling products and closing deals. But in reality, good managers are persuading all day long. As Conger explains with insight and conviction, today's most effective managers are influencing others through constructive forms of persuasion -- and their employees give them levels of commitment and motivation that the managers of the last generation could only dream of. Conger illustrates how three important forces -- new generations of managers and executives, cross-functional teams, and unprecedented access to information that was once the privilege of the most senior levels of management -- are undermining the old Age of Command and ushering in the new Age of Persuasion. He exposes the most commonly held myths about the art of persuasion and shows how to influence others productively, without manipulation. Most important, he outlines the four crucial components of effective managing by persuasion: building one's credibility, finding common ground so that others have a stake in one's ideas, finding compelling positions and evidence, and emotionally connecting with coworkers so that solutions resonate with them on a personal level. In Winning 'em Over, Conger explains how to implement a management style that will succeed in what is becoming a fundamentally and radically different business environment, and he provides readers with all of the new tools they will need to become effective, constructive persuaders. Lemon-Aid Used Cars and Trucks 20102011 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years of production. This book offers an exposé gas consumption lies, a do-it-yourself service manual, an archive of service bulletins granting free repairs, and more. REFERENCE USE ONLY 2003 New cars and Minivans. Patton chronicles the remarkable journey of the Volkswagen Beetle--the world's most famous car--from Nazism to the sixties counterculture, the Cold War and today's global manufacturing. As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers cant beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches. Launched 35 years ago, the 2007 edition of the New Cars and Minivans has been restyled to present more current information in a user-friendly manner. This guide tells you when to buy, sell, or hold onto a vehicle and why price rarely guarantees reliability (beware of 'luxury lemons'). Hard-nosed ratings, true fuel-consumption figures, and which safety features are unsafe, are all found in this year's guide, as well as: Dealer markups for each model; cutting the freight fee The best and worst options; whose warranty is the best Which 2006s are butter buys than a 2007 Sample compliant letters that work "Dodge 100 is the official, Dodge-licensed complete illustrated history of the legendary American automotive brand. From Horace and John Dodge's dealings with Henry Ford, through the war years, and into the modern age with cars like the Viper and Dodge Dart, Dodge 100 Years is the authoritative history of one of the world's first (and best) automakers"-- In Comeback, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction.

It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late. New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea. Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years? We have long recognized technology as a driving force behind much historical and cultural change. The invention of the printing press initiated the Reformation. The development of the compass ushered in the Age of Exploration and the discovery of the New World. The cotton gin created the conditions that led to the Civil War. Now, in *Beyond Engineering*, science writer Robert Pool turns the question around to examine how society shapes technology. Drawing on such disparate fields as history, economics, risk analysis, management science, sociology, and psychology, Pool illuminates the complex, often fascinating interplay between machines and society, in a book that will revolutionize how we think about technology. We tend to think that reason guides technological development, that engineering expertise alone determines the final form an invention takes. But if you look closely enough at the history of any invention, says Pool, you will find that factors unrelated to engineering seem to have an almost equal impact. In his wide-ranging volume, he traces developments in nuclear energy, automobiles, light bulbs, commercial electricity, and personal computers, to reveal that the ultimate shape of a technology often has as much to do with outside and unforeseen forces. For instance, Pool explores the reasons why steam-powered cars lost out to internal combustion engines. He shows that the Stanley Steamer was in many ways superior to the Model T--it set a land speed record in 1906 of more than 127 miles per hour, it had no transmission (and no transmission headaches), and it was simpler (one Stanley engine had only twenty-two moving parts) and quieter than a gas engine--but the steamers were killed off by factors that had little or nothing to do with their engineering merits, including the Stanley twins' lack of business acumen and an outbreak of hoof-and-mouth disease. Pool illuminates other aspects of technology as well. He traces how seemingly minor decisions made early along the path of development can have profound consequences further down the road, and perhaps most important, he argues that with the increasing complexity of our technological advances--from nuclear reactors to genetic engineering--the number of things that can go wrong multiplies, making it increasingly difficult to engineer risk out of the equation. Citing such catastrophes as Bhopal, Three Mile Island, the Exxon Valdez, the Challenger, and Chernobyl, he argues that it is time to rethink our approach to technology. The days are gone when machines were solely a product of larger-than-life inventors and hard-working engineers. Increasingly, technology will be a joint effort, with its design shaped not only by engineers and executives but also psychologists, political scientists, management theorists, risk specialists, regulators and courts, and the general public. Whether discussing bovine growth hormone, molten-salt reactors, or baboon-to-human transplants, *Beyond Engineering* is an engaging look at modern technology and an illuminating account of how technology and the modern world shape each other. In recent years, Chrysler has made waves with a series of dramatic new show cars, exciting production vehicles like the Prowler and Viper, and its mega-merger with German juggernaut Daimler-Benz. It is generally accepted that Chrysler is the most forward-thinking of the Big Three American automakers, yet the company also has a wonderfully compelling past. Just in time to mark Chrysler's 75th anniversary, this beautifully illustrated history takes readers on a journey that spans the company's genesis in the 1920s to present. Marvelous archival black-and-white photography is accompanied by nostalgic period color imagery, print ads, and new color photography of classics. The story includes model from Dodge, Plymouth, Imperial, and DeSoto, while sidebars highlight key figures and stunning feats of engineering and styling.
