Gregory Crewdson: An Eclipse of Moths Apr 11 2022 An Eclipse of Moths extends Gregory Crewdson's obsessive exploration of the small-town, postindustrial American landscape. Each of these sixteen, never-before-published images is composed at a cinematic scale with the artist's signature auteurial care. Downed streetlights, abandoned baby carriages, and decommissioned carnival rides set the scene for a cast of classic Crewdsonian characters--full of equal parts yearning and ennui. This collection of images is offered in a limited-edition, slipcased volume, sumptuously produced at a scale that offers an immersive experience of each of these carefully crafted scenes.

The Total Eclipse of Nestor Lopez Feb 21 2023 2021  
Pura Belpré Honor Book NYPL Best Book of 2020 2020  
Evanston Public Library Great Books for Kids In this magical middle-grade debut novel from Adrianna Cuevas, *The Total Eclipse of Nestor Lopez*, a Cuban American boy must use his secret ability to communicate with animals to save the inhabitants of his town when they are threatened by a *tule vieja*, a witch that transforms into animals. All Nestor Lopez wants is to live in one place for more than a few months and have dinner with his dad. When he and his mother move to a new town to live with his grandmother after his dad's latest deployment, Nestor plans to lay low. He definitely doesn't want to anyone find out his deepest secret: that he can talk to animals. But when the animals in his new town start disappearing, Nestor's grandmother becomes the prime suspect after she is spotted in the woods where they were last seen. As Nestor investigates the source of the disappearances, he learns that they are being seized by a *tule vieja*—a witch who can absorb an animal's powers by biting it during a solar eclipse. And the next eclipse is just around the corner... Now it's up to Nestor's extraordinary ability and his new friends to catch the *tule vieja*—and save a place he might just call

home.

Total Eclipses of the Sun Feb 26 2021 Eclipses have captured attention and sparked curiosity about the cosmos since the first appearance of humankind. Having been blamed for everything from natural disasters to the fall of kings, they are now invaluable tools for understanding many celestial as well as terrestrial phenomena. This clear, easy-to-understand guide explains what causes total eclipses and how they can be used in experiments to examine everything from the dust between the planets to general relativity. A new chapter has been added on the eclipse of July 11, 1991 (the great Hawaiian eclipse). Originally published in 1995. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

American Eclipse: A Nation's Epic Race to Catch the Shadow of the Moon and Win the Glory of the World 06 2021 This "suspenseful narrative history" (Maureen Corrigan, NPR) brings to life the momentous eclipse that enthralled a nation and thrust American science onto the world stage. On a scorching July afternoon in 1878, at the dawn of the Gilded Age, the moon's shadow descended on the American West, darkening skies from Montana Territory to Texas. This rare celestial event—a total solar eclipse—offered a priceless opportunity to solve some of the solar system's most enduring riddles, and it prompted a clutch of enterprising scientists to brave the wild frontier in a grueling race to the Rocky Mountains. Acclaimed science journalist David Baron, long fascinated by eclipses, re-creates this epic tale of ambition, failure, and glory in a narrative that reveals as much about the historical trajectory of a striving young nation as it does about those scant three minutes when the blue sky blackened and stars appeared in mid-afternoon. Lauded as a "sweeping, compelling" (Wall Street Journal) work of science history, American Eclipse tells the story of the three tenacious and brilliant scientists who raced to Wyoming and Colorado to

observe the rare event. Dedicating years of “exhaustive research to reconstruct a remarkable chapter of U.S. history” (Scientific American), award-winning writer David Baron brings to three-dimensional life these competitors—the planet-hunter James Craig Watson, pioneering astronomer Maria Mitchell, and the ambitious young inventor Thomas Edison—to thrillingly re-create the fierce jockeying of nineteenth-century American astronomy. With spellbinding accounts of train robberies and Indian skirmishes, the mythologized age of the Wild West comes alive as never before. An “enthraling” (Daniel Kevles) and magnificent portrayal of America’s dawn as a scientific superpower, *American Eclipse* depicts a young nation that looked to the skies to reveal its towering ambition and expose its latent genius.

*EPZ Eclipse of Reason* May 12 2022 In this book, Horkheimer surveys and demonstrates the gradual ascendancy of Reason in Western philosophy, its eventual total application to all spheres of life, and what he considers its present reified domination.

*Being in the Shadow* Oct 13 2019 Through personal stories of six ordinary people, this narrative non-fiction book describes what it is like to experience a total eclipse for the first time. After these stories, you will understand why you **MUST** try to experience this eerie and awe-inspiring event yourself. Essential reading, written by an eclipse-chasing psychologist.

The Eclipse of Biblical Narrative Jan 20 2023 Laced with brilliant insights, broad in its view of the interaction of culture and theology, this book gives new resonance to old and important questions about the meaning of the Bible.

Totality Dec 07 2021 A total eclipse of the Sun is the most awesome sight in the heavens. Totality: Eclipses of the Sun takes you to eclipses of the past, present, and future, and lets you see - and feel - why people travel to the ends of the Earth to observe them. Totality: Eclipses of the Sun is the best guide and reference book on solar eclipses ever written. It explains: how to observe them; how to photograph and videotape them; why they occur; their history and mythology; and future eclipses - when and where to see them. Totality also tells the remarkable story of how eclipses shocked scientists, revealed the workings of the Sun, and made Einstein famous. And the book shares the experiences and advice of many veteran eclipse observers. Totality: Eclipses of the Sun is

profusely illustrated with stunning photographs (many in color) and more than a hundred maps and diagrams. It can be read by lay people and astronomers with ease and enjoyment.

Eclipse of the Bright Moon Jul 22 2020 Can an American professor and Chinese activist students change Chinese history? In mid-April 1989, in the days leading up to the infamous Tiananmen Square Massacre, former US Marine Dan Norton was finishing up his year as a professor at Shaanxi Teachers University. Little did he know that in two weeks' time, he would be sought out by the police under threat of Chinese prison. Accused of engaging in espionage and harboring a fugitive, Dan struggles to balance his military training with his newfound Buddhist practice. Should he bow out of this fight by returning to America—or risk his life by standing with his students? Meanwhile, university students Song Yingying and her boyfriend Gao Mingyue both disobey their fathers' strict orders to avoid all political activity. Their secret poster campaigns swiftly escalate, and before they know it they're leading demonstrations, too. Touching on the complexities of

ethnic and intergenerational conflicts in China at the time, along with the politics, Eclipse of the Bright Moon follows the paths of a professor and his students through the difficult and dangerous choices that could usher in a brighter hope . . . or end their very lives.

Atlas of Central Solar Eclipses in the USA Dec 15 2019  
With the upcoming total solar eclipse of 2017 August 2 certain questions naturally arise as to the frequency of these events. When was the last total eclipse through the USA and when is the next? How often do they happen? What total eclipse tracks passed across the USA during the 17th, 18th, and 19th centuries, etc., and what states did they include? And how often is a total solar eclipse visible from each of the 50 states? In 2012 the track of an annular solar eclipse passed through the western USA. The same questions can be asked about this type of eclipse. The "Atlas of Central Solar Eclipses in the USA" answers all of these questions. It contains a comprehensive series of 499 global maps showing the geographic track of every single total and annular solar eclipse across the USA (including Alaska and Hawaii) during the two-thousand-year period 1001 through 3000. It is accompanied by a catalog that lists the major characteristics of each eclipse including its duration and whether it is visible from the lower 48 states, Alaska and/or Hawaii. Finally, a set of 20 detailed maps, each covering a 50 years and centered on the continental

USA (i.e., the lower 48 states), shows the path of every central eclipse (total or annular). The maps include state boundaries as well as the location of major cities. This allows quick determination as to whether a particular eclipse was visible from any state or city in question. These maps also cover southern Canada and northern Mexico. There is something compelling about the pattern of eclipse tracks crossing familiar places many hundreds of years in the past and future. It was this fascination that inspired the creation of the Atlas.

**Eclipse of the Self** Jun 20 2020 Includes information on Buddhism, Christianity, Dasein, ego, faith, fate, future, God, myth of the cave, myth of the sun, Zen Buddhism, etc.

**Eclipse of the Body** Nov 25 2020 The world is experiencing an eclipse of the meaning of the body. The definitions of boy and girl, masculinity and femininity, husband and wife, and mother and father have been obscured, and a shadow of confusion has been cast over gender, marriage, sex, and the family. Everything has been re-defined, and yet none of the new definitions are definite. Where did this come from—and more importantly—what needs to happen for the meaning of the body to become clear again? In this easy-to-read booklet, you'll discover what lies at the root of today's sexual chaos and gender confusion, and how it was foretold more than a century ago. You'll also learn how

Saint John Paul II's Theology of the Body provides the antidote to the crisis of our times and paves the way for the "Triumph" foretold by the Virgin Mary in Fatima.

The Eclipse of Heaven Oct 17 2022 "We live in a World no longer under heaven. At least in most people's minds and imaginations that vision of reality has become little more than a caricature, conjuring up the saints and angels of baroque frescoes. And in the church only a hint remains of the power it once exercised in the heart of believers". So begins A. J. Conyers in this provocative book, and suggests that the eclipse of heaven has resulted in a shallower view of life and death, in a loss of cultural and individual purpose, and in moral disarray. This is a powerful, persuasive plea to stop blocking heaven from our sight, and so to regain hope, meaning, and richer lives -- in this world and the one to come.

Eclipse of the Assassins Nov 13 2019 *Eclipse of the Assassins* investigates the sensational 1984 murder of Mexico's most influential newspaper columnist, Manuel Buendía, and how that crime reveals the lethal hand of the U.S. government in Mexico and Central America during the final decades of the twentieth century.

Eclipse of the Sun Aug 15 2022 In this fast-paced, reflective novel, (the second in a trilogy following *Strangers and Sojourners*) Michael O'Brien presents the dramatic tale of a family that finds itself in the path of totalitarian government. Set in the near future, the story describes the rise of a police state in North America in which every level of society is infected with propaganda, confusion and disinformation. Few people are equipped to recognize what is happening because the culture of the Western world has been deformed by a widespread undermining of moral absolutes. Against this background, the Delaney family of Swiftcreek, British Columbia, is struck a severe blow when the father of the family, the editor of a small newspaper which dares to speak the truth, is arrested by the dreaded Office of Internal Security. His older children flee into the forest of

the northern interior, accompanied by their great-grandfather and an elderly priest, Father Andrei. Their little brother Arrow also becomes a fugitive as the government seeks to remove any witnesses, and eradicate all evidence of its ultimate goals. As O'Brien draws together the several strands of the story into a frightening yet moving climax, he explores the heart of growing darkness in North America, examining events which have already occurred. The reader will take away from this disturbing book a number of urgent questions. Are we living in the decisive moment of history? How dire is our situation? Do we live in pessimistic dread, or Christian realism founded on hope? This is a tale about the victory of the weak over the powerful, courage over terror, good over evil, and, above all, the triumph of love
